Professional Summary

Senior Product Designer with 15+ years of experience in developer tools and enterprise SaaS. Currently designing Copilot extensibility platform experiences at Microsoft, translating complex AI systems into intuitive, trustworthy workflows for developers. Experienced in AI-driven UX design, design systems (Fluent UI), and inclusive design that meets Web Content Accessibility Guidelines (WCAG). Leads UX strategy, prototyping, design sprints, and user research to ship accessible, data-driven solutions, with a focus on high-craft visual design, systems thinking, and cross-functional collaboration with product managers and engineers.

Experience

Senior Product Designer

Microsoft, Copilot Extensibility | Nov 2025 – Present

- Design platform experiences that help teams extend Copilot with new capabilities, translating complex AI systems into intuitive, trustworthy workflows that people can use without deep machine learning (ML) expertise.
- Design tuning and control experiences that help developers shape AI behavior and outcomes, turning complex AI capabilities into scalable, human-centered product patterns.

Senior Product Designer

Microsoft, Azure Communication Services (ACS) | Sep 2021 – Nov 2025

- Owned the end-to-end UX vision for ACS developer tools in Azure Portal, including Short Codes, Sample Builder, and voice and SMS experiences.
- Created a number-purchasing redesign at Fix Hack Learn (FHL) 2022 that earned executive approval and a full-scale rebuild.
- Validated design hypotheses through usability testing, A/B testing, and heuristic evaluations, refining designs based on research insights to improve usability and product effectiveness.
- Led team ideation sessions and cross-functional design sprints with product managers and engineers to drive data- and user-centered decisions and synthesize complex solutions.
- Advanced team design systems from wireframe to high-fidelity, maintained Fluent UI consistency, and contributed to design-system evolution across Azure Portal.

Product Designer

Microsoft, Azure Communication Services (ACS) | Jan 2021 – Sep 2021

Product Designer 2

Microsoft, OneNote | Jul 2018 – Jan 2021

- Designed @mentions across OneNote for Windows, Mac, and Online.
- Led the integration of OneNote into Microsoft Teams with consistent Fluent UI.
- Optimized cloud-syncing logic to ensure seamless cross-platform usability between Web and Desktop.

Head of Product Design

GoFetch Technologies, Vancouver, Canada | Nov 2016 – Apr 2018

- Led UX strategy and design execution for Web and iOS marketplaces.
- Conducted extensive user research and prototyping, refining end-to-end user journeys to drive engagement and monetization.

Senior Interaction Designer

AVG Technologies, Amsterdam, Netherlands | Jul 2012 – Jul 2016

- Facilitated design sprints and iteration sessions.
- Produced UX for new and existing security products to expand market reach and monetize services.

Interaction and Visual Designer

Siemens Corporate Research, Princeton, USA | Jan 2011 – Jul 2012

- Led the definition and creation of interaction patterns and visual frameworks for Siemens products in healthcare and industrial applications.

Education

Master of Arts (MA), Interaction Design

L'École de Design Nantes Atlantique, Nantes, France | 2010

Master's Degree, Engineering and Innovation in Virtual Reality

Arts et Métiers ParisTech, Laval, France | 2010

Certifications

Certified Professional Scrum Product Owner I (PSPO I)

Scrum.org | 2015

Skills

Design: UX Design, Product Design, Interaction Design, Visual Design, High-Fidelity Prototyping, Information Architecture, Design Systems, Fluent UI, Design Sprints, Storyboarding, User Journey Mapping, Design Roadmapping, Copywriting

AI and Developer UX: AI and Large Language Model (LLM) UX Patterns, Agent UX Patterns, Copilot Extensibility Design, Conversational UX, Natural Language Processing (NLP), Chatbots, Human-Centered AI, Developer Tools, Enterprise SaaS

Research and Strategy: User Research, Moderated Usability Testing, Jobs-to-be-Done, A/B Testing, Hypothesis Testing, Design Critique and Review, UX Strategy, Systems Thinking, Cross-Functional Collaboration

Accessibility: Web Content Accessibility Guidelines (WCAG) Compliance, Inclusive Design, Assistive Technologies

Tools: Figma, Figma Make, FigJam, GitHub, GitHub Copilot, Claude Code
